## **DETAILED ACTION**

### ***Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, drawn to a method for monitoring the proliferation of cultured prostate cancer cells in the presence of one or more NSAID.

Group II, claim(s) 3-27, drawn to a method of treating an individual with prostate cancer or at risk of developing prostate cancer; or a method of reducing the risk of recurrence of prostate cancer in an individual that previously has been treated for prostate cancer; or a method of treating an individual with benign prostatic hyperplasia or at risk of developing benign prostatic hyperplasia.

Group III, claim(s) 28-29, drawn to a method of screening for compounds that inhibit the proliferation of prostate cancer cells.

Group IV, claim(s) 30-40, drawn to a composition of one or more NSAIDs.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is the administration or the presence of one or more

Art Unit: 1609

NSAIDs. This element cannot be a Special Technical Feature under PCT rule 13.2 because the element is shown in the prior art. For example, Tasken et. al. (US 2004/0082640) teach the administration of some NSAID for treating some immunodeficiency disorders (see abstract).

### ***Rejoinder notice***

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during

Art Unit: 1609

prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
